Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121.

I. Claims 16-27 drawn to a method of manufacturing an insulation product, classified in class 51.

II. Claims 1-15, and 28-35 drawn to an apparatus of an insulation product, classified in class 428.

The inventions I and II are related as process of making and product made. The inventions are distinct if either of the following can be shown:

(1) that the process as claimed can be used to make other and materially different product or

(2) that the product as claimed can be made by another and materially different process.

For instant case, the apparatus claims could be made by a method different than that group I such as using wooden panels for insulated walls.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper.

A telephone call was made to request an oral election on 7/31/2007, but did not result in an election being made.
